2. If teacher masters the professionalism material that produces a qualified learning process and students who excel, the material development of teacher's professional competence either based on the standard of competence of teacher's professionalism or considering students' ability.

### **C. Recommendation**

#### 1. For the Department of Education

To give more attention to the presence of a teacher, need to realize that teacher is the most important figure in advancing and improving knowledge of nation's generation. Department of education should prioritize the improvement of teacher's living standard regardless of their qualification.

#### 2. For the Principal

The principal is expected to more control teachers and maximize the supervision to students. It is because without intensive control, teacher's performance will decline.

#### 3. For Teachers

As the educator, teachers should be responsible of their profession, not often leave the classroom when teaching, be active in the development activity of professionalism held by the educational institution, and a teacher should be a creative teacher and has a wide knowledge to make students not feel bored. Teacher has mastered the professional competence well.

#### 4. For Students

Students are active in creating a good teaching and learning interaction, eliminating the culture of shame to ask and wait for teacher guiding.
