SUMMARY

DENNY ARIYANTO. A 320 030 080. AN ANALYSIS OF DERIVATIONAL FORMING NOUN ON *KANG GURU* MAGAZINE. RESEARCH PAPER. MUHAMMADIYAH UNIVERSITY OF SURAKARTA. 2012.

This research paper is aimed at answering the two problems. The problems are: (1) What lexical categories are there in derivational process, and (2) What are the phonological conditions in the derivation process of English nouns. This research uses documentation and observation methods to get the data. The data are words taken from the articles on the magazine. The writer concerns with the Analysis of Derivational Forming Noun on *Kang Guru* magazine.

To answer those problems, this research employs morphological analysis. The objectives are Identifying and analyzing the new derived words whether or not they have changed based on syntactical category. Analyzing the new derived words whether or not they have phonological changes based on phonological condition.

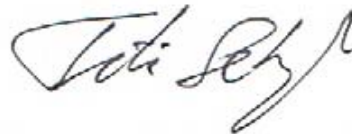

The result of this study shows that first, there are some lexical categories that are changed into noun, they are: derived lexical categories from verb, derived lexical categories from adjective, and lexical categories from noun . Second, there are phonological configurations in bases in derivational process.
