

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the research, findings, and discussion, the researcher concludes of the research study.

The researcher concluded that the challenges on teaching online are real. The students or teachers dealing the challenges, difficult to get good internet access, and even several students do not have a smartphone. Besides, the researcher concluded that since this pandemic situation the normal class at school cannot be used, so conduct online classes is better ways. However, the normal activity in the classroom is giving another atmosphere to the teaching-learning processes.

The researcher concluded that the problems caused by internet access and the teaching ways between online and normal classes are the main problem. The teacher and students surely want to back to the normal class, although the internet easier the teaching-learning process, however teaching online may not effective applied if the teacher and students do not ready yet. The solution are providing internet data packages for the students and the teacher, additional time for the students to send their assignment.

B. Suggestion

Based on the challenges faced by an English teacher in SMK Negeri 1 Nawangan on teaching online English subject, the researcher makes a suggestion, namely :

1. First of all, the internet problem faced by the teacher or students should be fixed since teaching online needs a good internet connection.

It may be done by the schools or government regulation, it can be a collaboration with the internet service provider to serves good access to the internet.

2. The students should be given more attention by the teacher when teaching online. The teacher can be sent personal message to the student who less respond in *WhatsApp Group*.
