AN ALYSIS OF INTERDENTAL AND LABIODENTAL SOUNDS IN RETNO LESTARI PRIANSARI MARSUDI'S SPEECH

ABSTRACT

This study aims to describe how voiceless interdental [θ], voiced interdental [ð], voiceless labiodental [f] and voiced labiodental [v] were articulated by Mrs. Retno Marsudi in the initial, medial, and final positions speech. This research employed descriptive qualitative approach using observation and document analysis to collect data. The subject of this research is Mrs. Retno Lestari Priansari Marsudi as Indonesia's Foreign Minister who comes from Central Java. The research data were collected from the speech transcription of Mrs. Retno Marsudi's in several event. The data shows that, in general, Mrs. Retno Marsudi could articulate interdental sounds and labiodentals in the initial, medial, and final positions. However, there were occasion where she changed the articulation of [θ] to [t] in all positions, to [d] at the final of the position; the articulation of [ð] to [d] in all positions, to [θ] at the medial and final of the position, and change to [t] at final position; and change the articulation of [v] to [f] in all positions. The data also showed a consistent articulation of the sound [f] at all positions, and there was also sound shifting in the voiced interdental articulation sound, [ð] to [d], [θ], and [t] at final position. In addition, the study show a silent articulation, in which the voiceless interdental sound [θ] was not articulated in the medial and final positions.
