ABSTRAK

Banyak orang menggunakan ucapan untuk memberikan informasi, pengalaman, dan imajinasi atau perencanaannya. Tidak terkecuali juga oleh seorang Presiden Indonesia, Joko Widodo yang akrab dengan kesehariannya menggunakan ucapan untuk berpidato di depan masyarakat, audiensi umum, dan juga delegasi dari luar Indonesia. Ucapan yang digunakan akan mempengaruhi makna yang akan disampaikan. Penelitian ini bertujuan untuk mengetahui makna ucapan yang disampaikan oleh Presiden Jokowi saat berpidato. Serta, mencari korelasi kesinambungan makna menggunakan teori ucapan dan variasi mood. Hasil penelitian menunjukkan adanya kesinambungan makna saat dianalisa menggunakan teori ucapan dan juga variasi mood. Langkah pertama dalam melakukan analisa yakni mengklasifikasikan data ke dalam tindak tutur komisif atau ekspresif. Hal ini bertujuan untuk mengetahui variasi mood data yang akan digunakan untuk melakukan integrasi tindak tutur dengan variasi mood. Kedua, menganalisis elemen variasi mood data di mana peneliti mengklasifikasikannya ke dalam jenis suasana hati tertentu. Dan ketiga, menganalisis data berdasarkan fungsi mood untuk mengetahui makna dari ucapan yang digunakan. Dalam fungsi analisis variasi mood, peneliti mengidentifikasi tipe data dari variasi mood.

ABSTRACT

Many people use speech to convey information, experiences, and imagination or planning. The President of Indonesia, Joko Widodo, is no exception, who is familiar with his daily use of speech to address the public, general audiences, and delegates from outside Indonesia. The speech used will affect the meaning to be conveyed. This study aims to determine the meaning of the utterances conveyed by President Jokowi during his speech. Also, looking for correlations of continuity of meaning using speech theory and mood variations. The results of the research show that there is a continuity of meaning when analyzed using speech theory and also variations in mood. The first step in conducting the analysis is to classify the data into commissive or expressive speech acts. This aims to determine variations in mood data that will be used to integrate speech acts with variations in mood. Second, analyzing the mood variation elements of the data where the researcher classifies them into certain types of moods. And third, analyzing the data based on the mood function to find out the meaning of the utterances used. In the mood variation analysis function, the researcher identifies the data types of mood variations.
